由于切割片只是切割系统中的一部分(机床、工件材料、操作参数和砂轮), 每位客户的应用各不相同, 圣戈班都会为客户提供Toros的定制产品。 根据您的需求, 我们的专家会为您确定最佳的应用参数, 确保达到您最佳的技术和经济目标。圣戈班新型混合磨料产品的开发, 多种结合剂和砂轮硬度的可选择性, 以及圣戈班专利的磨削性能分布图, 为满足客户特定的磨削需求提供了强力支持。

Because the abrasive tool is only one part of the cutting system (machine, material, process parameters and abrasive wheel), it is unique for each of our customers. For these reasons, the TOROS line offers customized products. Our experts will help you determine the best approach for your application, guaranteeing the best technical and economical outputs according to your needs. This is possible thanks to a wide availability of bonds and grades, as well as newly developed abrasive blends and is supported by extensive Performance Mapping, a Saint-Gobain patented process.
