# Norton: Innovation in DIY

This professional, cutting edge abrasive DIY range consists of a comprehensive selection of abrasives for hand and machine sanding, cutting discs and grinding wheels, diamond blades, wire brushes, polishing accessories and sharpening stones.

Through professional quality, we will help to better educate our users, with proven industrial and innovative abrasive products to improve quality of finish, ease of use and speed of task.

With impactful, informative design and with innovation at its heart, the Norton range provides a dynamic offering.

This is achieved through:

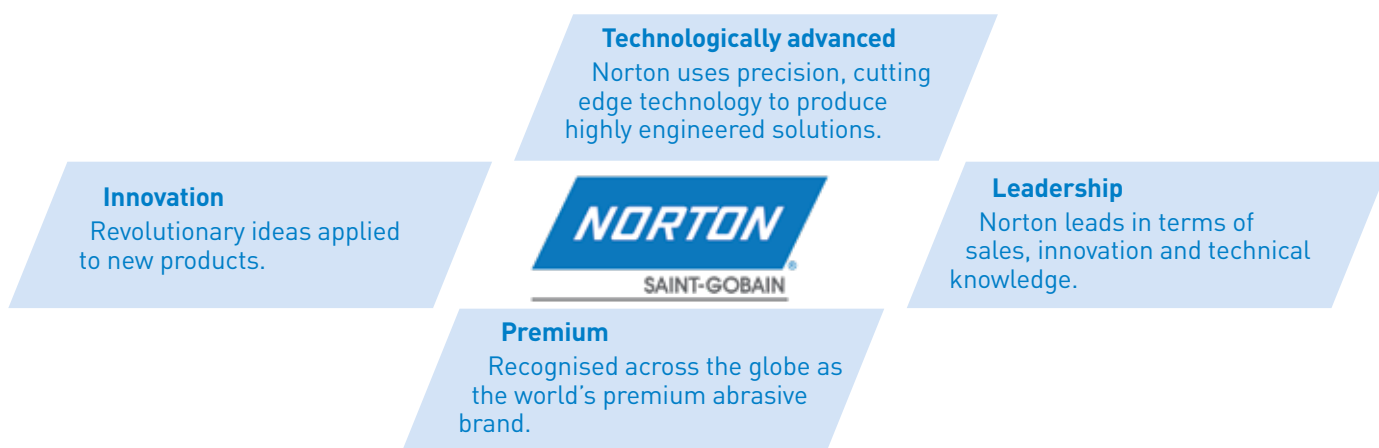

- Impact at point of purchase
- Clear, concise application led communication and informative packaging design
- Ease of product selection
- Colour coded packaging system to aid product identification and encourage multiple basket purchase
- High quality, superior performance abrasives

# The World's Premium Abrasives Brand

Norton offers powerful, precise and user friendly solutions enabling your end users to shape and surface-finish all types of materials even in the most complex DIY applications.

As the technology leader, Norton sits at the forefront of the industry providing highly engineered, high-performance abrasives. Norton's continual investment in R&D and close collaboration with customers generates performance optimised innovations. This strong commitment ensures that exciting new products are continuously introduced offering substantial benefits to customers and end users. With a complete range of abrasive products that add value and efficiency, Norton is reshaping the world of abrasive solutions.

## Saint-Gobain Abrasives: A World Class Manufacturer

With operations in 64 countries, employing almost 190.000 people, Saint-Gobain is one of the world's top 100 leading industrial corporations. Saint-Gobain Abrasives has a presence on every continent, with operations in 26 countries, employing c.10.700 people; and is the only international manufacturer of the five main types of abrasives: bonded, coated, diamond blades, cutting discs and grinding wheels and super abrasives.

Through the World Class Manufacturing programme, Saint-Gobain Abrasives has been able to reduce loss and waste, improve operational efficiency and product quality and ensure excellence in production capabilities. All operational and support functions; manufacturing, purchasing, product development and business processes are involved, with the aim to achieve world class manufacturer status in all our factories.

## Distribution Centres

With two main logistics platforms and several local distribution centres all over Europe, our logistics professionals ensure that the Norton products reach you on time. Quick and special delivery services can be arranged upon request to best suit end-user requirements (conditions apply).

# The Norton Range

## Cutting Discs and Grinding Wheels

Norton Expert wheels are designed for use on a wide range of materials including steel, stainless steel, cast iron and stone and come in a wide range of sizes 115mm to 230mm for angle grinders and 300mm to 350mm for petrol and chop saws.

## Diamond Blades

As the use of diamond blades continues to grow in DIY, novice and professional users are demanding better finishes and faster results. With in-depth knowledge of the construction and building industries, Norton Expert provides a range of diamond blades suitable for cutting general building materials, concrete and ceramic; providing a solution for all projects.

## Hand & Machine Sanding

Norton coated abrasives for hand and machine sanding use cutting edge technology designed to exceed the expectations of even the most demanding DIYer.

The range of hand abrasives has been specifically designed for sanding wood and plaster surfaces and can be used on existing and newly developed hand tools.

## Wire Brushes & Polishing Accessories

Wire brushes are an excellent alternative to using heavy duty abrasive discs. For stripping, cleaning and polishing metal and wood surfaces, the assortment of shapes and varieties means there's a brush for every application. The brushes and polishing accessories are for use with electric drills, angle grinders and bench grinders. Hand brushes are also available.

## Sharpening Stones

For sharpening tools in and around the home and garden, the new range of sharpening stones offers a professional solution of bonded abrasives. Each stone is specifically designed for different blade sharpening applications to achieve a sharper, longer lasting finish.

## Point of Sale Support

To support selling activity, visual aids including headers, bus stops and second site point-of-sale units are available on request, offering product and selection information in a professional, vibrant, educational format.

The aim:

- Demonstrate an integrated and complete product range
- Inform, educate and help end users select the right product for their task
- Save time – reduce time spent selecting the right product
- Encourage multiple and repeat purchase
- Better informed end users shop better, quicker and increase abrasive category revenue.

# Building our environment together

## Habitat Centre of Excellence

As the world leader in designing, manufacturing and distributing Habitat and construction materials, Saint-Gobain is committed to meeting some of the fundamental challenges faced by the world today: reducing energy consumption, limiting our impact on the environment, and creating a new generation of buildings which are safe, comfortable and energy efficient.

Today we are leaders in all our industry sectors, providing proven, easy-to-use systems aligned to local needs, practices and legislative requirements in every part of the Habitat and construction markets, from homes to public buildings and offices, and from new-builds to renovation projects.

Abrasives combines with the other Saint-Gobain businesses to offer a complete solution for those who work within Habitat markets:

Plumbing

Building

Carpentry

Painting & Decorating

Tiling

Some of Europe's most respected companies and brands in the Habitat and construction sectors are part of Saint-Gobain:

## Habitat Centres of Excellence

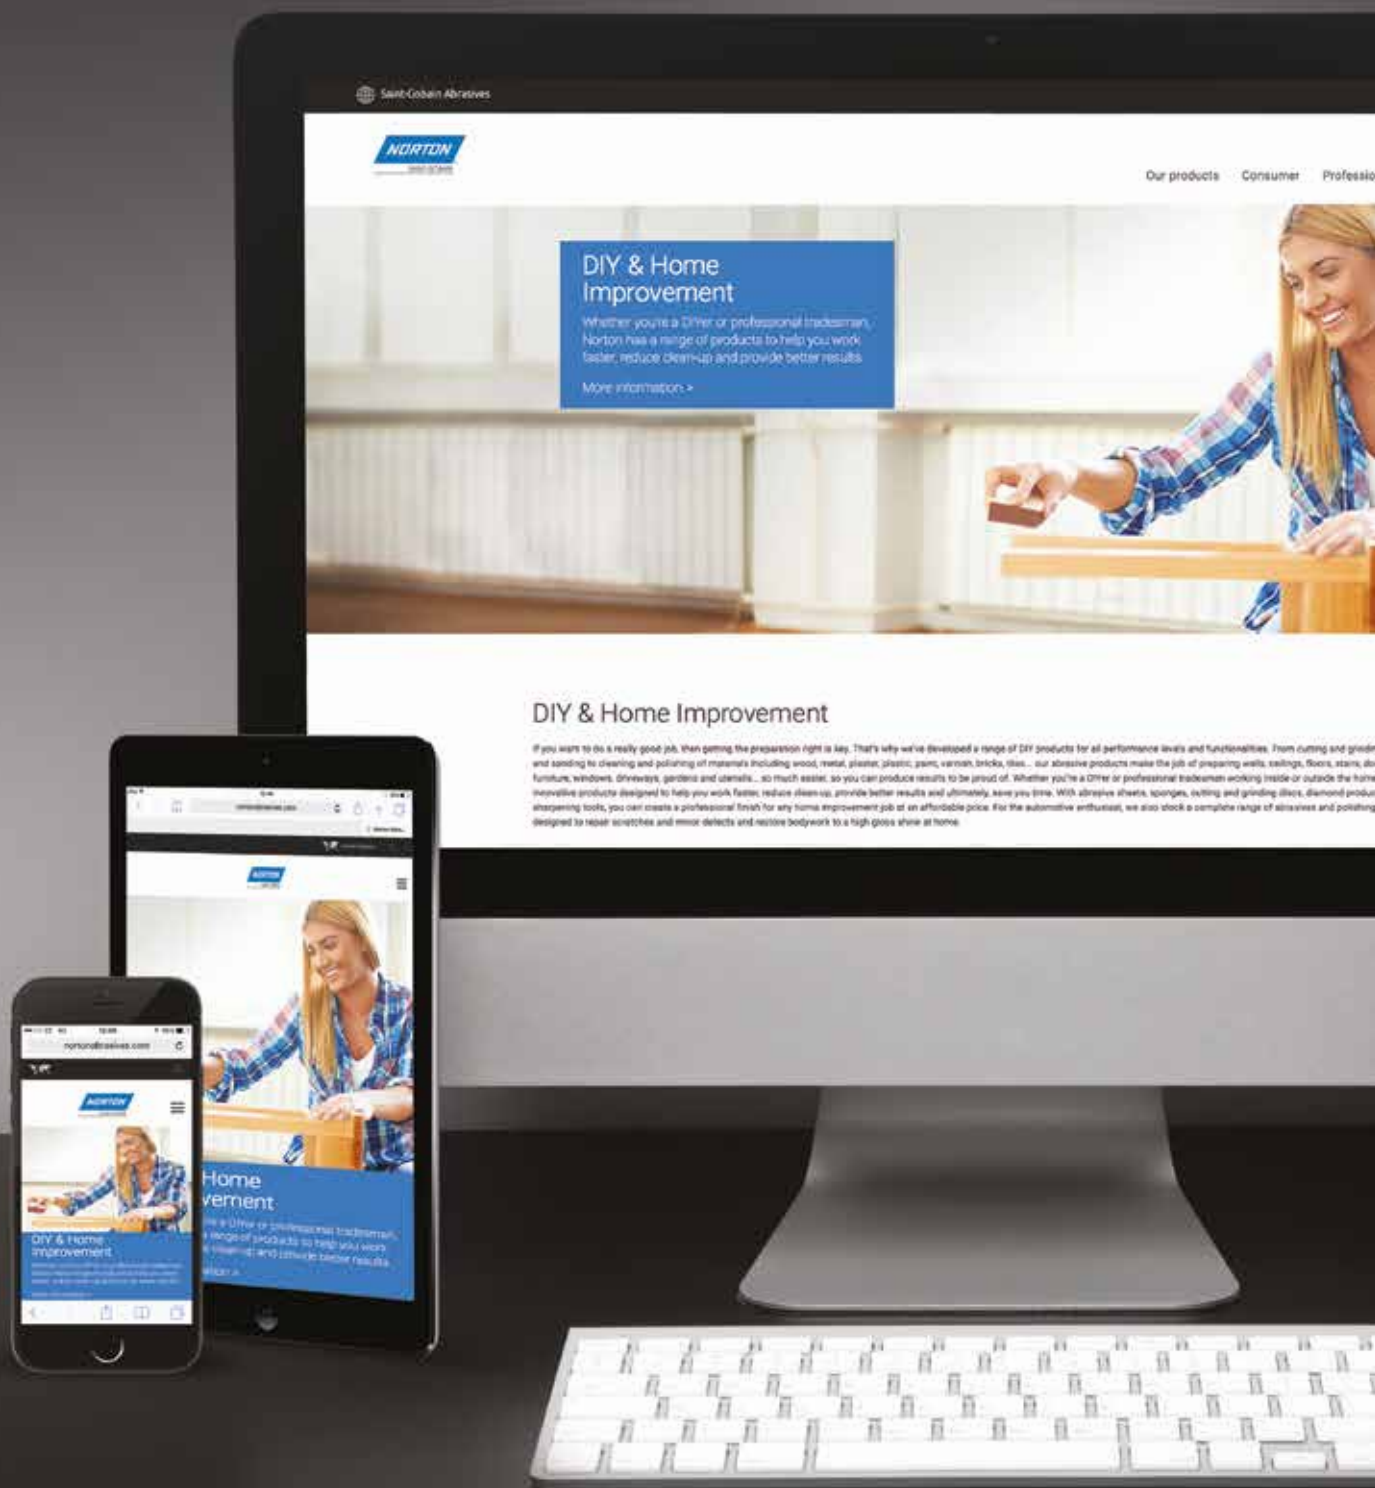

Our state-of-the-art product testing facilities or 'Centres of Excellence' are paramount to continuing our commitment to delivering technological excellence. Located in our manufacturing plants across the globe, each centre concentrates on the development of exciting new products for all abrasive applications and contributes to the product knowledge of our sales teams and customers.

Reshaping  
your  
world.

# How to Use this Catalogue

This catalogue is divided into sections by product type – Cutting Discs and Grinding Wheels, Diamond Blades, Hand & Machine Sanding, Wire Brushes & Polishing Accessories and Sharpening Stones.

At the beginning of each section you will find useful information, including:

- Product Innovations
- Selecting the Right Product
- Understanding the Packaging
- Understanding the Range

This is followed by informative and easy to use product charts. The charts include all of the information needed to make your selection.

## How to Order

Please contact your local Customer Service Centre, details can be found on the back page of the catalogue. For countries that are not listed please send your request to our European Headquarters.

When placing an order it helps to have the following information available:

- Your name
- Your account number
- Your order or reference number
- Product article number(s)
- Required quantity
- Any special instructions

If you require additional product or technical information then please do not hesitate to contact your local Customer Service Centre or Sales Representative.

# Useful Information

Norton Expert offers an extensive range of professional, high performance wheels suitable for cutting and grinding a wide range of materials including steel-inox, stainless steel and stone and can be used on angle grinders, petrol saws and chop saws. Norton Expert wheels come in a wide range of sizes, from 115mm to 230mm for use on angle grinders and 300mm-350mm for petrol and chop saws.

## Multi-Purpose Wheel

The perfect solution for all cutting and grinding needs. The ultra thin Multi-Purpose wheel produces less noise, less dust and a precise, straight cut on all materials including steel, stone, aluminium, inox, ceramics and tiles. The unique construction and low vibration counteracts loading and offers comfortable working.

## 3-in-1 Wheel

Cutting, grinding and finishing with one single product is now possible! The unique three layered reinforced structure, combined with selected abrasive materials make this product a unique innovation.

## Accu

For years machine manufacturers have made cordless battery powered right angle grinders... but batteries ran out of charge too quickly and grinding power was limited. This is now changing through a new generation of cordless grinders with newly developed batteries generating significantly improved battery life and machine power.

These developments have necessitated a wheel that compliments and optimises the new improved battery life and Accu does exactly that! Developed in collaboration with leading machine manufacturers, Accu wheels maximise the efficiency of the angle grinder and help to increase its working time.

Accu grinding wheels have been developed to give minimal resistance when in use and its free cutting feature absorbs less energy from the battery. It also features a special bond and grain which gives improved user comfort and longer wheel life.

## 1-2-3 Multi Purpose No wheel change required

Unique and patented design which cuts, grinds and polishes ALL materials i.e. steel, glass, aluminum, concrete, stone, copper, PVC, wood or stainless steel. With Norton 1-2-3 no wheel changes are needed when working with different applications and materials.

## Accu 1.0 mm For minimum loss of power

The 1.0 mm Accu cutting wheel gives a quick straight cut, preventing loss of power. The free cutting characteristic ensures that no additional battery power is lost as the wheel moves freely within the workpiece. Accu 1.0 mm gives maximum performance in both steel and inox applications.

## Understanding the Packaging

# Troubleshooting Guide

To get the best from Norton Expert cutting discs and grinding wheels it is important that you:

- Determine the material application and select the most suitable Norton Expert product.  
Using the right wheel for the right material is very important for the life and cutting/grinding behaviour of the wheel. Please consult your local Customer Service or Sales Representative, if in doubt
- Check the machine is operating correctly and that the machine does not exceed the speed indicated on the wheel. Always use the wheel at its recommended speed

Below is a troubleshooting guide that will help solve some of the most common problems associated with cutting discs and grinding.

## Cutting Discs:

Type 41  Type 42 

Problem	Possible cause	Solution
Excessive wheel wear	In case of white cutting edge: Wheel too soft Operating speed too low Decrease of RPM during cutting	Use harder wheel Increase RPM up to max. (80m/sec) Use machine with more power Reduce pressure on the machine
Wheel does not cut	In case of blue cutting: Wheel too hard or too thick Peripheral speed too low	Use softer or thinner Norton Expert wheels Check peripheral speed Increase RPM up to max. (80m/sec)
Crumbled wheel edge	Cutting discs used for grinding operations Workpiece is moving Too much side-pressure	Use a grinding wheel for grinding operations Clamp the workpiece properly Add only the radial pressure to the wheel
Arbor hole or centre break out	Wheel sticks in the workpiece / material  Cutting discs used for grinding operations Too much side pressure Different diameter top/bottom flange	Use more radial pressure and swing the wheel forwards and backwards Use a grinding wheel for grinding operations Add only the radial pressure to the wheel Use flanges with the same diameter

## Grinding Wheels:

Type 27 

Problem	Possible cause	Solution
Excessive wheel wear	Wheel too soft Too much pressure Decrease of peripheral speed Too low peripheral speed	Use harder wheel Reduce pressure, let the wheel do the grinding Use machine with more power Reduce pressure on the machine Max. 80 m/s is optimum speed
Wheel does not grind	Wheel too hard, wheel glazing Not enough pressure Machine power too low	Use softer wheel Increase pressure Use machine with more power
Crumbled wheel edge	Grinding angle too flat Workpiece is moving Too much pressure	Change angle to 30–40° Clamp the workpiece properly Reduce pressure, let the wheel do the grinding
Out of balance (vibration)	Dirty flanges Wheel mounting insecure Flanges with different diameter	Clean flanges Tighten flanges Replace flanges

## General Safety

Instructions for Use	Cutting discs and grinding wheels should only be used on materials for which they are suitable. This is shown by means of pictograms on the product, the packaging and in the catalogue.
Cutting Discs	When using cutting discs, keep the wheel straight in cut and apply light pressure – let the wheel do the work.
Grinding Wheels	When using grinding wheels keep the wheel at an angle of 30-40° to the workpiece.
Safety Measures	<p>Suitable eye protection must be worn. It is recommended that other safety equipment is also used.</p> <div></div> <p>Dust Protection    Wear Gloves    Eye Protection    Ear Protection    Read Instructions    Not for Side Grinding    Damaged Wheel</p>
Protection of the Workpiece	Portable angle grinders should be used in such a manner that sparks fly away from the operator's body and any flammable material.
Safety Guards	The wheel guard of the machine must be in position and securely fixed.
Stopping the Machine	Switch off the machine and allow the wheel to stop completely before placing it on a bench or on the floor. Never bring the wheel to rest by applying pressure to the wheel surface.
Shelf Life of Cutting Discs and Grinding Wheels	All cutting discs and grinding wheels have a use by date engraved on the metal bore ring. Wheels should not be used after this date.

# Safety Advice

## SAFETY ADVICE – DO'S AND DON'TS:

For your safety you should ensure that you are fully aware of how to safely use cutting discs and grinding wheels.

- ✓ **DO** always handle and store wheels carefully. All cutting and grinding wheels should be placed on top of each other or stored in the original packaging.
- ✓ **DO** always visually inspect all wheels before mounting for possible damage in transit.
- ✓ **DO** always use a safety guard and ensure that it is correctly positioned and securely fitted. It should cover at least one half of the wheel and protect the operator in the unlikely event of a wheel breakage.
- ✓ **DO** always switch 'OFF' the power at supply source and/or remove the plug from the socket before changing the wheel.
- ✓ **DO** always use the tools supplied by the machine manufacturer to change the wheel.
- ✓ **DO** always ensure that the speed of the machine does not exceed the operating speed marked on the wheel.
- ✓ **DO** allow newly mounted wheels to run at operating speed, with the guard in place, for a reasonable time before cutting or grinding.
- ✓ **DO** always wear EYE PROTECTION.
- ✓ **DO** always wear appropriate safety clothing such as DUST MASK, GLOVES, EAR PROTECTION, OVERALLS AND SAFETY SHOES.
- ✓ **DO** always secure the workpiece firmly while it is being cut or ground.
- ✓ **DO** grind at an angle above 30 degrees to the workpiece with a depressed centre grinding wheel.
- ✓ **DO** keep the working area around cutting and grinding operations clear.

## DON'TS!

- ✗ **DON'T** store wheels in a damp atmosphere or in extreme temperatures.
- ✗ **DON'T** mount a damaged wheel.
- ✗ **DON'T EVER** exceed the maximum operating speed marked on the wheel.
- ✗ **DON'T** force a wheel onto a machine spindle.
- ✗ **DON'T** tighten the mounting nut or locking flange excessively. Doing so can distort the flanges.
- ✗ **DON'T** use a machine which is not in good mechanical condition.
- ✗ **DON'T** use a machine without a wheel guard.
- ✗ **DON'T** use wheels without proper ventilation or dust protection equipment.
- ✗ **DON'T** stop the wheel by applying pressure to the periphery or face. Always switch the machine off and allow the wheel to stop revolving.
- ✗ **DON'T** allow the wheel to be trapped or pinched in the cut.
- ✗ **DON'T** apply excessive pressure onto the wheel so that the driving motor slows down.
- ✗ **DON'T** grind on the side of cutting discs.
- ✗ **DON'T** grind with a depressed centre grinding wheel at an angle below 30° to the workpiece.

# 27-34 DIAMOND BLADES

- 28** Useful Information
- 30** General Building Materials
- 31** Concrete & Reinforced Concrete

- 31** Ceramic & Porcelain Tiles
- 32** Safety Advice

# Useful Information

The use of diamond blades within DIY is growing as enthusiasts and professionals become increasingly more knowledgeable and experienced, demanding better finishes and faster results. With in-depth knowledge of the construction and building industries, Norton Expert provides a range of diamond blades to meet any demand. All Norton Expert blades conform to the European safety standard EN13236, the most demanding in the world.

## Understanding the Range

The Quality Tier		
Better	Jet 500 Uni 500 Ceram 500	High performance and high value professional products ideal for regular use.
Good	Jet 100 Laser 100 Ceram 100	This range of standard blades offers a good level of performance.

### INNOVATION

## Ceramic & Porcelain Tiles: Ceram 500

A new concept for DIY, this continuous rimmed diamond blade is designed for wet cutting and can be used on all types of tile cutting machine for ceramic, marble, porcelain and quarry tiles. For these materials, precision and quality of cut is essential and the continuous rim blade is perfect for achieving a smooth, fine edge.

- Continuous rim for smooth cut
- Suitable for hard ceramic tiles
- 7mm high diamond rim for longer life

Machine Pictograms				
Angle Grinder	Table Tile Saw	Rail Tile Saw	Floor Saw	Petrol Saw

## Selecting the Right Product

Selecting the right diamond blade for the job is not always straightforward, for this reason, Norton Expert blades are colour coded to help ensure the most appropriate tool is selected.

## General Building Materials

For use on building materials including breeze blocks, paving slabs, concrete curb stones and clay roof tiles.

**JET 100** and **JET 500**: the corrugated continuous rim gives a smooth high quality cut, even on brittle materials like roof tiles.

**UNI 500**: this segmented diamond blade is suitable for cutting general purpose materials.

Dimensions (mm)	Product Description	Segment Height (mm)	Case Quantity	Article No.	Barcode
115x22.23	JET 500	10	1	70184640909	5450248461555
125x22.23	JET 500	10	1	70184640910	5450248461562
230x22.23	JET 500	10	1	70184640911	5450248461579

# Safety Advice

## SAFETY ADVICE – DO'S

For your safety you should ensure that you are fully aware of how to safely use diamond blades.

- ✓ **DO** Store abrasives in dry, frost-free conditions avoiding wide variations in temperature
- ✓ **DO** Ensure that the product is suitable for its purpose
- ✓ **DO** Handle, store and transport products with care
- ✓ **DO** Disconnect the power to the machine before fitting the product
- ✓ **DO** Examine all products before mounting and periodically during blade use for possible defects or damage (core flatness, fatigue cracks, undercutting, arbor hole damage...)
- ✓ **DO** Check that correct mounting devices are used and that they are clean, undistorted and free from burrs
- ✓ **DO** Ensure that work rests are properly adjusted and secure
- ✓ **DO** Always use a correctly designed and adjusted guard (on the blade and belts)
- ✓ **DO** Ensure that the workpiece is secure
- ✓ **DO** Wear appropriate personal protective equipment at all times
- ✓ **DO** Avoid clogging and uneven wear to ensure that the product is working efficiently
- ✓ **DO** Ensure accordance between product direction arrow / machine rotation
- ✓ **DO** Ensure that all machines using abrasives meet the requirements of the current European Machinery Directive-CE
- ✓ **DO** Be aware of the hazards likely during the use of abrasives and observe the recommended precautions to be taken:
  - Bodily contact with the abrasive product at operating speed
  - Injury resulting from product breakage during use
  - Grinding debris, sparks, fumes and dust generated by the grinding process
  - Noise
  - Vibration

## RPM At Maximum Operating Speed 80 M/S

Diameter (mm)	105	115	125	150	180	200	230	250
Max RPM	15.300	13.300	12.250	10.200	8.500	7.650	6.650	5.100

### NEVER EXCEED the maximum operating speeds:

- Hand held blades  $\varnothing \leq 230\text{mm}$  : 80 m/s
- Hand held blades  $\varnothing \geq 230\text{mm}$  : 100 m/s

Not to be used for side grinding

Read the instructions

Wear hearing protection  
EN352

Wear eye protection  
EN166B

Wear gloves  
EN388 cat.2

Wear a respirator  
EN149

Wet cutting  
ONLY

## SAFETY ADVICE – DON'T'S

For your safety you should ensure that you are fully aware of how to safely use diamond blades.

- ✗ DON'T** Allow untrained people to use abrasives
- ✗ DON'T** Use a product that is damaged or one which has been dropped
- ✗ DON'T** Use a product if it cannot be properly identified
- ✗ DON'T** Use a machine that is not in good working order or one with defective parts
- ✗ DON'T** Force the abrasive onto the mounting device or modify the size of the mounting hole
- ✗ DON'T** Exceed the maximum operating speed marked on the product
- ✗ DON'T** Apply shock or excessive force to the product or let it overheat
- ✗ DON'T** Use mounting flanges which are not clean and flat
- ✗ DON'T** Tighten the mounting device excessively
- ✗ DON'T** Start the machine until the guard is in place and fastened securely
- ✗ DON'T** Continue to use a product if vibration occurs.
- ✗ DON'T** Grind on the part of the product which is not designed for the operation
- ✗ DON'T** Start the machine with the workpiece in contact with the abrasive product
- ✗ DON'T** Grind material for which the product is not designed
- ✗ DON'T** Stop the abrasive by applying pressure to its surface, let it stop naturally
- ✗ DON'T** Exceed permissible rotation speeds: refer to values engraved on product
- ✗ DON'T** Use blades with missing segments or core cracks
- ✗ DON'T** Use dry products marked for wet use
- ✗ DON'T** Wear loose clothing, ties and jewellery
- ✗ DON'T** Use abrasive products near flammable materials

# Useful Information

Norton Expert hand sanding products are designed with the end user in mind. Clear communication and pack design, combined with high performance, cutting edge technology products ensure the needs of even the most demanding DIYer are met.

## Understanding the Packaging

Norton Expert logo for professional quality brand recognition

Stage of sanding clearly communicated

Background image clearly depicts the surface the product is used for

Product dimensions, pack quantity and pictogram showing how the product is used

The image shows the front of a Norton Expert sandpaper package. It features the Norton Expert logo at the top. Below it, a blue banner indicates 'Stage 1' sanding. The text 'Décapage', 'Wood Stripping', and 'Grof schuren' are prominently displayed. A large '40' in a blue circle indicates the grit number, with 'GROS' and 'COARSE' written around it. A background image shows a wooden staircase. A small window shows the sandpaper itself. Text on the package describes it as 'Tuffe abrasive super flexible' and 'Super Flexible'. A 'x3' icon indicates the pack quantity. The article number '730.288' is visible at the bottom.

Icon showing the four stages of sanding process, encourages multiple purchase and maximises basket quantity

Grit number clearly communicated and supported by text description

Supporting text to communicate type of substrate product is used on

Window exposing product

Article number used for reordering

Explanation of range benefits

Table communicates application details for each stage of sanding

Information showing the different ways the product can be used

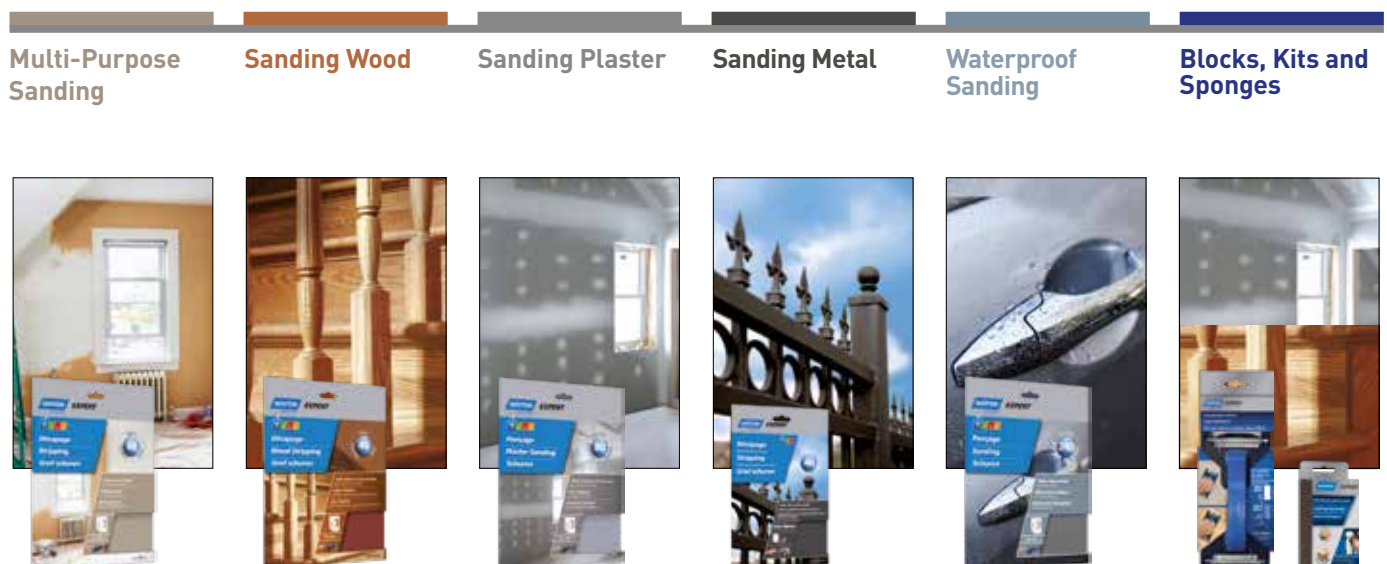

The image shows the back of the Norton Expert sandpaper package. It contains a table with four rows, each representing a stage of sanding (1, 2, 3, 4) with corresponding grit numbers and application details. Below the table, there is a section titled 'Wegwijzer' (Wayfinder) which provides information on how to use the product, including a pictogram showing different sanding techniques. The bottom of the package features a barcode and additional technical information.

---

## Understanding the Range

A range of abrasives has been specially selected for sanding wood, plaster and metal surfaces. A number of blocks, sponges, kits and accessories are also available for use with the abrasives and to complement the range.

---

Using a sequence of grits is key to achieving a perfect finish. Norton Expert has developed a unique abrasive formula to achieve a beautiful result at each stage of sanding:

The 'Sanding Stage' icon represents four grits, each used for a different stage of sanding. The icon is colour coded with the packaging and designed to aid the end user's understanding of the product most suitable for each step of their application.

The icon always appears on the front of the packaging, with a detailed explanation of each stage on the back and is designed to increase product recognition and encourage multiple and repeat purchase, making the selection and buying process simple, quick and easy.

# Useful Information

## Selecting the Right Product

### HAND SANDING ROLLS AND SHEETS

#### Self Gripping Sanding Rolls

Can be used by hand, with a sanding block or on a self gripping machine. New merchandising-friendly packs allow rolls to be hung on a display. Available in each of the four stages of sanding from Heavy Stripping to Fine Finishing.

#### Multi-Purpose Sheets & Rolls

This tough and sharp aluminium oxide abrasive is ideal for use on a range of surfaces for general purpose sanding and material removal. Available in each of the four stages of sanding from Stripping to Super Finishing. Can be used by hand or with a block or clip fixing machine.

#### Sheets & Rolls for Sanding Wood

A high performance aluminium oxide grain and cloth backing for excellent flexibility and performance on bare, painted and varnished wood. Use by hand or with a sanding block or clip fixing machine, for each stage of sanding from Stripping to Super Finishing.

#### Sheets & Rolls for Sanding Plaster

The Ceramic SG® technology grain and flexible fibre reinforced paper backing provides superior performance and improved resistance. The No-Fil® coating reduces clogging for a faster cut and extended product life. Ideal for all plaster sanding and finishing applications. Can be used by hand or with a block or clip fixing machine.

#### Waterproof Sheets

The sharp silicon carbide grain and waterproof paper backing makes this paper ideal for finishing. Waterproof paper is specially treated making it ideal for use with water. The paper lasts longer and gives a smoother finish when used wet as the water cleans, lubricates and helps prevent clogging. Can be used by hand or with a block or clip fixing machine.

#### Emery Cloth for Metal

Emery is a natural composite, for fast and aggressive removal of painted, rusted and corroded metal surfaces. The fast cutting emery is backed with a heavy cloth, allowing the sheet to be torn into strips, giving excellent flexibility to curved and contoured surfaces.

## DUST FREE SANDING KITS

### Dust Free Sanding Kit & Refills

The Dust Free Sanding Kit means less dust, mess and dirt! A dust free environment reduces clean-up time, improves the working environment and benefits health. Can be used with most vacuum cleaners to eliminate excess plaster, wood, paint or metal, whilst sanding. The revolutionary Multi-Air® technology, combined with premium Norton Expert abrasives saves time – up to 25%, increases dust extraction – up to 35% and increases productivity – up to 35%.

Kit contains:

+

+

P40 Grit x1  
P80 Grit x1

P120 Grit x1  
P180 Grit x1

Refills available  
for each stage of  
sanding

INNOVATION

### Dust Free Sanding Kit for Wood and Plaster

The new Dust Free Sanding Kit has been specially designed for sanding all types of wood surfaces, plaster and filler. A dust free environment reduces clean-up time, improves the working environment and benefits health. Like the original, the new Dust Free Sanding Kit attaches to most vacuum cleaners and reduces dust, mess and dirt using the revolutionary Multi-Air® technology, designed to increase productivity and performance by up to 35%.

Kit contains:

+

+

Wood  
P80 Grit x1  
P120 Grit x1

Plaster  
P120 Grit x1  
P220 Grit x1

Refills available  
for each stage of  
sanding

INNOVATION

### Dust Free Delta Sanding Kit

Following the success of the Dust Free Sanding Kit comes a revolutionary new design from the Multi-Air® family. The Dust Free Delta Sanding Kit is the perfect solution for sanding small and hard to reach areas while extracting dust reducing clean-up time, improving the working environment and benefiting health. Refills are available for sanding both wood and plaster.

Kit contains:

+

Wood  
P80 Grit x1  
P120 Grit x1

Plaster  
P120 Grit x1  
P220 Grit x1

Refills available  
for each stage of  
sanding

# Useful Information

## Selecting the Right Product

### SANDING KITS

#### Plaster Sanding Kit & Refills

A complete sanding kit specifically designed for sanding plaster. The kit is a time saving sanding solution for dry walls, with quick and easy sheet changing. Refills are available for sanding rough surfaces and finishing & smoothing prior to painting. Available in sizes 115x280mm and 93x230mm.

Kit contains:

+

P120 Grit x2  
P220 Grit x2

Refills available  
for each stage of  
sanding

#### Medium and Large Sanding Kit for Plaster & Wood

A complete sanding kit for sanding plaster and wood. The kit is a time saving and ergonomic solution for sanding medium and large areas. The clip fastening system allows quick and easy sheet changing. The abrasives are included in the kit, with refills available for each stage of sanding. Available in sizes 115x280mm and 93x230mm.

Kit contains:

+

Wood

P80 Grit x1  
P120 Grit x1

Plaster

P120 Grit x1  
P220 Grit x1

Refills available  
for each stage of  
sanding

#### Small Surface & Corner Sanding Kit

This unique innovation has been produced to meet the varied needs of the end user. The flat surface is ideal for sanding large areas quickly while the raised pointed front can tackle any small, hard to reach area. The block is self-gripping for quick and easy sheet changing. A versatile, adaptable product that is comfortable and easy to use. Self-gripping refills for plaster and wood are included and are also sold separately.

Each kit contains:

+

Wood

P80 Grit x1  
P120 Grit x1

Plaster

P120 Grit x1  
P220 Grit x1

Refills available  
for each stage of  
sanding

---

## SANDING BLOCKS

### Self Gripping Foam Block

Designed for use on small, flat surfaces the ergonomic design and foam material make sanding easy and comfortable. Self-gripping refills for plaster and wood are included and are also sold separately.

Refills available for each stage of sanding

### Self Gripping Dual Purpose Foam Block

A unique product for sanding flat and contoured surfaces. With both sides self gripping, the hard foam side is ideal for sanding flat surface areas, turn the sponge over and the soft foam side is perfect for curves and contours. Refills are included inside the kit for sanding plaster and wood surfaces.

### Pole Sander

Robust pole sanding head attachment, ideal for comfortable sanding of hard to reach areas such as walls, ceilings and floors.

### Sanding Blocks (Rubber & Cork)

Can be used with all types of sandpaper sheets or rolls for better sanding control and an even surface finish, making sanding quicker and easier.

## SANDING SPONGES

### Small Sanding Sponge

Washable and reusable dual grit sponge for small areas and contours. Available in Coarse/Medium for sanding rough or built up surfaces and Medium/Fine for sanding surface imperfections, finishing and creating a key on a variety of surfaces including furniture, door frames, coving and windows.

### Large Sanding Sponge

Ideal for sanding large areas and contours. Dual Medium/Fine grit for sanding surface imperfections, finishing and creating a key on all material types. Can be washed and reused for longer product life.

# Useful Information

## Selecting the Right Product

### SANDING SPONGES

#### Angled Sanding Sponge

Washable and reusable dual grit angled sponge for hard to reach areas and contours. Available in Medium for sanding surface imperfections and Fine for finishing and creating a key on a variety of surfaces including furniture, door frames, coving and windows.

#### Dual Angled Sanding Sponge

Washable, reusable dual grit dual angled sponge for hard to reach areas and contours. Available in Coarse/Medium for sanding rough or built up surfaces and Medium/Fine for sanding surface imperfections, finishing and creating a key on a variety of surfaces including furniture, door frames, coving and windows.

#### Contour Sponges

A flexible, washable and reusable solution for curves and contours. Pack contains a medium and fine grade for sanding and finishing.

### SANDING ACCESSORIES

#### Pre-Paint Dust Cloth

Adhesive cloth is ideal for removing dust and particles from a surface, prior to varnishing and painting.

#### FSC® CERTIFICATION

Utilising responsibly sourced material and preserving natural resources is a high priority, look out for the FSC® logo next to products manufactured using FSC® certified paper.

# Hand Sanding Rolls & Sheets

## Self Gripping Sanding Rolls

A new innovation from Norton Expert!

Self-gripping rolls can be used by hand, with a sanding block or on a self gripping machine. An excellent multifunctional product.

Can be used on all wood, paint and metal surfaces.

	Sanding Stage	Grit	Pack Quantity	Box Quantity	Article No.	Barcode

# Hand Sanding Rolls & Sheets

## For Sanding Plaster

High performance ceramic SG® abrasive technology combined with flexible fibre reinforced backing and an anti-clogging No-Fil® layer provide excellent results and improved resistance when sanding and smoothing plaster and filler.

Can be used by hand, with a block or on a clip fixing machine.

Rolls for sanding plaster are FSC® certified.

## FSC® CERTIFICATION

Utilising responsibly sourced material and preserving natural resources is a high priority, look out for the FSC® logo next to products manufactured using FSC® certified paper.

# Hand Sanding Sheets

## Waterproof Sheets

Waterproof sheets combine sharp silicon carbide grain and specially treated waterproof paper backing. Can be used wet or dry, use wet for best results as the water cleans, lubricates and helps prevent clogging.

Can be used by hand, with a block or a clip fixing machine.

	Sanding Stage	Grit	Pack Quantity	Box Quantity	Article No.	Barcode

# Sanding Kits

## Plaster Sanding Kit & Refills

The complete kit for sanding plaster. The screenbak abrasive reduces clogging whilst sanding, and the ergonomic handle gives greater control and a comfortable grip. The flat surface area means it covers large areas quickly and clip fastening allows fast and easy abrasive sheet changing.

Refills are available for sanding rough surfaces and finishing and smoothing prior to painting.

# Useful Information

Norton Expert Coated Abrasives for machine sanding are cutting edge technology, high performance products designed to meet the expectations of even the most demanding DIYer. The extensive product line provides an effective sanding solution for each stage of sanding, saving time.

## Understanding the Packaging

Norton Expert logo for professional quality brand recognition

Icon showing the four stages of the sanding process, encourages multiple purchase and maximises basket quantity

Stage of sanding clearly communicated in three languages

Product dimensions, pack quantity, machine type grouped in easy to find area

Surface substrates product can be used on

Article number used for reordering

Multi-Air® logo communicates this product extracts dust and can be used on all machines

Grit number clearly communicated & supported by text description

Product image showing hole configuration and machine

Window exposing product

Explanation of range benefits

Table communicates features and benefits, with application images representing product in use

Products are available for selling in **retail pre-packs** which contain smaller product quantities and are designed for merchandising from hooks on a display unit. The pack quantities and packaging format are ideal for the DIY market.

**Trade packs** contain higher pack quantities, are shrink-wrapped and designed to target higher volume users including semi-professionals within DIY, Hardware, Builders Merchants, Painting and Decorating sectors and Industrial retail.

## Understanding the Range

Using a sequence of sanding grits is key to achieving a perfect finish. Norton Expert has developed a unique abrasive formula for beautiful results at each stage of sanding:

Stage		Grit	Description	
<b>1</b>	<b>Heavy Stripping</b>	<b>40</b>	Strong and robust, Heavy Stripping products are suitable for applications requiring high material removal. The unique self sharpening NorZon® grain has millions of small, sharp edged crystals which fracture, producing new sharp edges, for an unrivalled and long lasting high material removal rate.	
<b>2</b>	<b>Rough Sanding</b>	<b>80</b>	Removing stubborn layers of wood, paint and metal, residues and small imperfections, Rough Sanding is manufactured from high performance aluminium oxide and ideal for intermediate sanding work.	
<b>3</b>	<b>Light Sanding</b>	<b>120</b>	Use for smoothing the surface after rough sanding, the aluminium oxide grain makes Light Sanding perfect to use before and between coats.	
<b>4</b>	<b>Fine Finishing</b>	<b>180</b>	For the perfect, paint ready finish, Fine Finishing removes scratches and prepares the final surface finish. The No-Fil® coating provides anti-clogging properties which prevents wood, paint or metal from building up on the sandpaper.	

# Useful Information

## Selecting the Right Product

### FOR DELTA SANDERS

#### Delta Sanding Sheets

Delta sheets are self-gripping so can be changed quickly and easily. They fit most brands of delta sanders and are available in each of the four stages of sanding from Heavy Stripping to Fine Finishing.

### FOR MULTI-SANDERS

#### Multi-Sander Sheets

Self-gripping for quick and easy sheet changing. They fit most brands of detail sanders and are available in each of the four stages of sanding from Heavy Stripping to Fine Finishing and in a variety of sizes and hole configurations. Also available with an anti-clogging open mesh structure for excellent performance and long life.

### FOR ORBITAL SANDERS

INNOVATION

#### Multi-Air® Orbital Cut Sheets

The new Multi-Air® hole configuration makes product selection easy! Just one product can be used on a number of different machines. The multi hole perforation optimises dust extraction for cleaner sanding. Available in each of the four stages of sanding, from Heavy Stripping to Fine Finishing for maximum results.

For use with any hole configuration

INNOVATION

#### Universal Self-Grip Adaptor

A unique innovation designed to transform clip fastening machines into self-gripping. A strong adhesive on one side and a self-gripping surface on the other makes this product ideal for use with all Multi-Air® orbital cut sheets.

For use with any hole configuration

#### Perforated Orbital Cut Sheets

Norton Expert offers a range of perforated orbital cut sheets for each of the four stages of sanding from Heavy Stripping to Fine Finishing and in a variety of sizes and hole configurations.

### Non-perforated Orbital Cut Sheets

Norton Expert offers standard cut sheets without holes in each of the four stages of sanding from Heavy Stripping to Fine Finishing.

## FOR ECCENTRIC SANDERS

INNOVATION

### Multi-Air® Sanding Discs

The new Multi-Air® hole configuration makes product selection easy! Just one product can be used on a number of different machines. The multi hole perforation optimises dust extraction for cleaner sanding. Available in each of the four stages of sanding, from Heavy Stripping to Fine Finishing for maximum results.

For use with any hole configuration

### Paper Sanding Discs

Norton Expert offers a range of self gripping abrasive discs as well as paper discs without holes, both in all four stages of sanding for perfect results every time.

### Anti-clogging Screenbak Sanding Discs

A range of self-gripping abrasive discs available for sanding and finishing. With an anti-clogging open mesh structure for excellent performance and long life.

## FOR DRYWALL SANDERS

### Sanding Discs for Drywall Sanders

A range of self-gripping abrasive discs available for sanding and finishing, for use on 225mm dry wall sanders.

## FOR PORTABLE BELT MACHINES

### Cloth Belts

A wide variety of belt dimensions are available for a number of sanding applications. From 8x454mm to 100x610mm – there's a belt for every use. Manufactured from NorZon® abrasive for high performance and excellent material removal. Available in all four sanding stages for perfect results every time.

# For Delta Sanders

## Delta Sanding Sheets

Delta abrasives are self-gripping for quick, easy sheet changing.

Available in standard 95mm to fit most brands of delta sander and in each of the four stages of sanding from Heavy Stripping to Fine Finishing.

## INNOVATION

## Adhesive Adaptor

Converts non-self-gripping machines to self-gripping. The strong adhesive backing sticks fast to the machine, while the front face has a self gripping surface on which to place the product. The hole configuration is Multi-Air®, allowing the product to be used with any machine.

# Technical Information

## What is a Coated Abrasive?

Coated abrasives are generally used for sanding, deburring, scouring, polishing, and finishing applications. They are manufactured in a wide variety of forms, types, and dimensions. However, all coated abrasive products consist of the same specific components, which are: abrasive grain, backing material, and bond. Varying each of these components helps give each abrasive product unique qualities that make it suitable to specific applications.

## Norton Expert Abrasive Grains

Aluminium Oxide	A tough grain, characterised by a cool cut, long life and the ability to fracture under pressure, producing new cutting edges. Well adapted to stripping, sanding and finishing applications on all types of wood, paint and metal.
Zirconia Alumina	A mix of aluminium oxide and zircon, NorZon grain is self sharpening, breaking down over time and regenerating its sharp cutting edges providing long life when sanding. Manufacturing at high temperatures produces a much harder grain, a key requirement when cutting through tough material such as wood and metal.
Screenbak Abrasive	An innovative mesh network impregnated with high performance abrasive grains reduces clogging whilst stripping or sanding plaster surfaces, and can be used on both sides for longer product life.
Ceramic Abrasive	Due to the consistent fracture properties in the grain, ceramic abrasive is the hardest and sharpest grain used in coated abrasives, making it ideal for finishing and plaster applications. This, combined with a No-Fil® coating provides maximum performance, load resistance and long product life.

## Backing Material

The backing material must be smooth enough to allow a uniform application of adhesive coating, strong enough to withstand sanding pressures and, where necessary, flexible enough to conform to the contours of the workpiece. Norton Expert uses the following backing types:

Paper	Cloth
Weight of paper influences the product characteristics, lighter paper is more flexible and heavier paper is stronger and less likely to tear.	Cloth gives great durability and flexibility offering resistance to tearing, and tolerating continual bending and flexing during use. Cloth backed products are only used for dry sanding operations and are ideal for heavy material removal.

## Storage Conditions

Coated abrasives should be stored in dry frost-free conditions. They should be kept away from cold and damp, and not be exposed to high temperature variations or direct sunlight.

Excessively dry or humid storage may cause deformation.

## Safety in Use

All coated abrasives should be handled carefully. Safety goggles, safety gloves and dust masks should be worn.

Safety instructions provided by machine manufacturers must be followed.

Make sure the abrasive is suitable for the application before use.

No modifications should be made to the product.

# Useful Information

Norton offers a range of wire brushes and polishing accessories, providing a complete abrasive solution. From steel and stainless steel products for heavy stripping to lambswool wheels for polishing, we have it covered.

Our all new range gives users More.

More comfort, more quality, more safety and more simplicity.

- More comfort thanks to features such as a hexagonal shaft on the drill range which minimises vibrations.
- More quality built in, with 100% high quality brass fibres for long lasting and effective performance.
- More safety, with the addition of a range of angle grinder brushes with a protective guard.
- More simplicity thanks to our packaging design, making the selection process simple and giving customers the information they need to make the right choice for any project.

## Selecting the Right Product

		HEAVY STRIPPING Hard		STRIPPING Medium			CLEANING Light		POLISHING Soft	
		Used on steel surfaces that require a tough stripping. Typical applications could include removing heavy corrosion, weld cleaning, stock removal and rough surface preparation.		Ideal for cleaning, renewing and refreshing wood, steel and stainless steel. A great choice when faced with dirty, tarnished, or rusty surfaces.			Brushes for smoothing, removing light rust, paint and burrs from a surface.		For polishing and finishing metal, plastic, glass, marble and stone surfaces.

# Useful Information

Norton Expert sharpening stones are high performance products for different blade sharpening needs in the home, garden or workshop. The high performance grain from which the stones are made ensures excellent metal sharpening with minimal grinding pressure.

### Knife Sharpener

A unique innovative Norton Expert accessory for any kitchen. The Knife Sharpener is extremely effective and can increase the performance of all types of kitchen knives. It is also easy to use and compact for convenient storage in any kitchen drawer.

### Sharper Finish

All Norton Expert sharpening stones are manufactured from high performance abrasive grain for a longer lasting, sharper finish.

## Selecting the Right Product

Sharpening Stone	Application		Use
Dual Sharpener			Ideal for all household and garden knives, blades and tools.
Curved Blade Sharpener			Ideal for all household and garden knives, blades and tools with curved edges.
Handy Sharpener			Ideal for all household knives, blades and tools.
Garden Tool Sharpener			For all garden knives, blades and tools.
Small Tool Sharpener			Can be used on all small knives, utility blades and tools.
Knife Sharpener			For sharpening all types of kitchen knives.

# For Household & Garden Tools

## Dual Sharpener

The Dual Sharpener combines a coarse and fine aluminium oxide grain to provide a strong, keen, long lasting edge on all types of kitchen and garden tools.

125 x 50 x 19mm	Coarse/Fine	1	5	7660717599	3157620460688

## Curved Blade Sharpener

The rounded edge of the Curved Blade sharpener is ideal for sharpening and honing bead planers, curved knives and tools and wood gouges.

Dimensions	Grade	Pack Quantity	Box Quantity	Article No.	Barcode
115 x 45 x 10mm	Medium	1	5	7660718327	3157620585091

## Handy Sharpener

The Handy Sharpener has an ergonomic handle for comfortable, easy use. The shape of the stone conforms to all flat and curved cutting edges.

Dimensions	Grade	Pack Quantity	Box Quantity	Article No.	Barcode
190 x 15mm	Fine	1	5	7660717592	3157620453819

## Garden Tool Sharpener

Ideal for all large garden and workshop tools, including shears, sickles and scythes, silicon carbide grain in this stone is designed to quickly restore worn out tools for maximum sharpness and quick results.

Dimensions	Grade	Pack Quantity	Box Quantity	Article No.	Barcode
240 x 35 x 13mm	Medium	1	5	7660718322	3157620453604

## For Household & Garden Tools

### Small Tool Sharpener

This sharpening stone can be used on all small home and garden tools including nail scissors and secateurs. The small dimensions mean it can be carried and stored easily and the aluminium oxide grain provides long lasting sharpness.

Dimensions	Grade	Pack Quantity	Box Quantity	Article No.	Barcode
6 x 19 x 100mm	Medium	1	5	7660718323	3157620453703

### Knife Sharpener

A unique innovation, this compact, easy to use rolling wheel sharpener has two slots, to sharpen each side of the blade, with a built-in proper angle for sharpening.

Dimensions	Grade	Pack Quantity	Box Quantity	Article No.	Barcode
35 x 45mm	Medium	1	12	66243530493	3157625595866

# Technical Information

## Safety When Using Sharpening Stones

Sharpening stones are very effective when used correctly. Following these simple guidelines will make sure that you use them safely and effectively.

### Sharpening blades, knives, and other tools

There is nothing more impractical than a dull blade. With these simple steps you can restore their sharpness easily and safely.

#### Step 1

Place knife or blade diagonally across stone and tilt heel of blade 15 – 35° to meet factory bevel angle.

#### Step 2

Holding wrists rigid, draw across and down from heel to tip of knife blade.

#### Step 3

Alternate blade sides until sharp. Do not be overly concerned about the grinding angle, but do control the consistency of the angle throughout the sharpening.

### Sharpening Chisels

#### Step 1

First flatten the face by guiding blade across stone length using long, oval strokes until you have a uniform surface and finish.

#### Step 2

Establish the angle of the bevel. Holding wrists rigid, move the blade forward down the length of the stone using the whole stone width, applying pressure only in the forward motion.

#### Step 3

Remove excess by lightly stroking the stone against the cutting edge of the chisel.

### Sharpening Curved General Tools

#### Step 1

Clamp tool handle in vice or hold by the handle.

#### Step 2

Apply stone at an angle parallel with bevel edge.

#### Step 3

Stroke in small circular motions on one side of the blade and then the other.

### Knife Sharpener

#### Step 1

Place the sharpener on a flat surface and position the knife's edge against the stone at a 45° angle, as shown in the diagram.

#### Step 2

Apply slight pressure, move the knife back and forth in a saw-like movement, so that the knife's cutting edge slides on the stone. Allow the sharpener to roll freely during this operation. Repeat the motion 10 to 15 times on each side of the cutting edge.

#### Step 3

To obtain a cutting edge similar to that of a blade follow the above steps and then slide each side of the blade two more times, this time applying less pressure with a very gentle motion.
