THE **MUSCLE** BEHIND THE MACHINE®

SAINT-GOBAIN

Our Mission

We offer powerful, precise, user-friendly solutions, which enable our customers to cut, shape and finish all materials even in the most complex and challenging applications. By working closely with end-users and our grinding expert partners, we design and provide customized solutions to secure the best option for performance, cost and safety.

Our Expertise

Norton is the leading brand of Saint-Gobain Abrasives, with more than 135 years of experience in manufacturing abrasives.

We are committed to providing access to our expert's knowledge whenever you need it. Whether it is through ongoing training programs, or through on-line expert articles and white papers you can stay up-to-date with Norton where and when you need it.

Bring us your hardwood floor challenges, we have solutions!

Our Commitment

You be the final judge in performance! We are so confident of the superior performance of our abrasive products, as recommended for specific applications, that we invite in-plant tests against any other brand of abrasive product on the market. Contact your Norton Representative to find out more about our No Risk test policy or visit www.nortonabrasives.com

Norton Ceramic Products Application Guide

Norton offers multiple ceramic products, like Red Heat, Blaze and MeshPower, to handle any application from sanding the toughest AO finishes to scratch-free final finishing. Each ceramic product utilizes a different type of ceramic grain designed with a specific application in mind. Choosing the right product will help you get the job done faster and with the best results possible. Unlike competitive ceramic products all Norton premium ceramic products feature 100% ceramic grain for longer life, faster cut, and a finer scratch.

Red Heat R955P, H955, Q955

Red Heat is the standard when it comes to performance ceramic products for floor sanding. The patented SG ceramic grain is extremely sharp, uniform, and leaves a shallow scratch which allows it to perform well in both residential and sports floor applications and makes it ideal for multi-disc and planetary sanders. The uniform grain and shallow scratch make it suitable for multiple applications from sanding softwoods to the hardest exotics to sanding engineered wood with thin wear layers. Red Heat screens are the go-to choice when staining difficult woods and offer double the life and a much finer scratch than conventional screens.

Blaze R975

Blaze R975 belts and rolls were designed primarily for sports floors to quickly and efficiently sand multiple coats of old finish, but they are also ideal for residential applications with tough old coatings. The longer shape of the premium ceramic grain and open coat design in the coarse grits allows for very fast material removal while minimizing loading. The 100% premium ceramic grain still leaves a fine scratch that is easy to clean up. Best applications include sanding multiple coats of finish and paint in sports floor applications, quick removal of old coatings in residential floors, and sanding many types of AO finishes.

BlazePlus R980P

BlazePlus R980P is one of Norton's flagship ceramic products designed for grinding the hardest materials. It has the longest life and fastest cut of any product on the market. The unique ceramic, grain which is extremely sharp and tough along with a heavy Y-weight polyester backing, makes it the ideal choice for sanding the toughest AO finishes along with tough finishes like moisture cure and conversion varnish. The unique design doesn't require any special sanding technique for sanding AO finishes like other products do. Hook & Loop discs turn planetary sanders into aggressive machines capable of sanding old coatings and flattening floors quickly.

BlazeX F970

Blaze F970 fiber discs are designed to work in conjunction with Blaze+ R980P belts and rolls. They make quick work of edging the toughest AO pre-finished floors, saving time and reducing fatigue. The super-sharp and tough ceramic grain, along with the heavy fiber backing, give it a much longer life and more aggressive cut than regular edger discs, while still leaving a fine scratch.

Blaze H995P

Blaze H995P paper is the newest addition to the ceramic offering. It uses a premium ceramic grain that gives the longest life and fastest cut when edging all types of finishes and applications. Suitable for very hard finishes, including AO finishes. It is ideal for multi-disc and planetary sanders, leaving a swirl-free finish.

MeshPower

MeshPower is a 100% ceramic, long-lasting, hook and loop backing, mesh screen that is the ideal choice for final sanding on multi-disc, planetary sanders, and ROS sanders. It leaves the finest scratch of any product, making ideal for the most demanding finishing applications like dark stains and hard wax oils. It has a No-Fil coating that reduces loading to extend product life. It can also be used for abrading between coats of finish on multi-disc-sanders and regular buffers.

Popular with professional contractors for use on larger jobs

Ideal for heavy stock removal

Mounted to a belt machine for continuous sanding

Levelling floors and achieving a very smooth finish

Used to do the main portion of the floor

Best choice for sport floor market and extremely effective sanding pre-finished floors

BLAZE R975 CLOTH / BLAZEPLUS R980PP CLOTH

- Super-sharp premium ceramic grain cuts fast and delivers unparalleled longevity resulting in less belt changes and more footage per job. Leaves a fine scratch for easier sanding and a better overall finish
- Open coat grain design minimizes loading and provides an aggressive cut to easily sand through multiple layers of tough coatings
- Anti static backing improves dust collection and keeps machines cleaner
- Tough poly-cotton backing is extremely strong and flexible for improved tracking and easy application/installation on drum sanders
- Choose heavy-duty, longer-lasting Blaze R980PP for the hardest floor surfaces

THE MOST VALUABLE PRODUCT IN THE SPORT FLOOR MARKET

Norton Blaze delivers an incredibly sharp cut unrivaled in the sport floor market. Designed to cut faster and more aggressively, it has the unique ability to remove multiple layers of coatings quickly and without issue.

Designed specifically for the toughest sanding applications, Norton Blaze tackles gym floor re-sands with ease and is proven to cut through UV-cured pre-finished floors in one pass. When you're racing against the clock to get the job done, put Norton – Blaze in your starting lineup.

Best choice for smoothest finish

RED HEAT R955P CLOTH

- Provide significant increase in square foot coverage, sanding anywhere from 1,000 - 3,000 square feet
- Provide a cut so aggressive you can flatten the floor using one or two grits finer than any other belt
- Cut through A/O pre-finished flooring with ease and minimal belt consumption

UNLEASH THE HEAT!

100% patented SG (Seeded Gel) ceramic alumina abrasive for longest life, fastest cut and more consistent finish. Tough X-weight cotton cloth backing is extremely flexible and shock absorbent for extreme conditions. No risk of color transfer with assured color consistency. Ideal for larger jobs and harder A/O finishes.

TECH TIP

When sanding pre-finished floors, common sense would say to start by using the coarsest grit available to sand off a very tough coating. In reality, the opposite is true. By starting with a coarse grit, you will get decreased product life and performance.

The proper sanding technique for pre-finished floors involves sanding the floor first with a finer grit, usually 80 grit. Sand the finish lightly with 80 grit, just to scratch the surface. Then come back with a coarser grit, usually 40 or 50 grit is coarse enough to remove the finish. Using this technique will greatly increase product life and cut rate. This technique works for the edger as well as the belt sander.

Better choice for fast cut on hard wood species

BLUEFIRE R831 CLOTH

- Next generation of patented, premium, self-sharpening, 100% zirconia alumina abrasive for longer life, faster cut and outstanding durability
- The anti-static technology increases dust collection efficiency for a cleaner working environment
- The improved resin bond ensures grain retention under the most demanding applications
- The consistent scratch pattern means the finest finish of the floor

GET ON THE WINNING TRACK!

The Norton Fast Track Belt Service

FastTrack is a special order service for sanding belts. Items are identified as FastTrack in the catalog by FT following the part number. Orders for all FT and NS items can be placed on regular stock orders submitted through Customer Service.

2-Day Manufacturing Lead Time

ORDER REQUIREMENTS:

- Minimum order qty: 1 case per order
- Maximum order qty: 2 cases per order

NOTE: Standard manufacturing leeway of 10% ±.

Used to do the main portion of the floor

A pre-cut roll cover is cut to spec and mechanically applied to a rubber drum

Rolls are preferred for their ease of storing and carrying over pre-cut sheets

Rolls are generally used for larger jobs

Commonly used in the rental trade due to its lower cost vs. belt sanders

Best choice for sport floor market and extremely effective sanding pre-finished floors

BLAZE R975 & R980P CLOTH / BLAZE H995P PAPER

- Super-sharp premium ceramic grain cuts fast and delivers unparalleled longevity resulting in less belt changes and more footage per job. Leaves a fine scratch for easier sanding and a better overall finish
- Open coat grain design minimizes loading and provides an aggressive cut to easily sand through multiple layers of tough coatings
- Anti static backing improves dust collection and keeps machines cleaner
- Tough poly-cotton backing is extremely strong and flexible for improved tracking and easy application/installation on drum sanders
- Choose heavy-duty, longer-lasting Blaze R980P for the hardest floor surfaces
- H995P features heavy-weight fiber-reinforced paper backing stands up to even the most difficult applications

THE MOST VALUABLE PRODUCT IN THE SPORT FLOOR MARKET

Norton Blaze delivers an incredibly sharp cut unrivaled in the sport floor market. Designed to cut faster and more aggressively, it has the unique ability to remove multiple layers of coatings quickly and without issue.

Designed specifically for the toughest sanding applications, Norton Blaze tackles gym floor re-sands with ease and is proven to cut through UV-cured pre-finished floors in one pass. When you're racing against the clock to get the job done, put Norton Blaze in your starting lineup.

Best choice for overall smoothest finish

RED HEAT R955P CLOTH & H955 PAPER

- 100% patented ceramic alumina (SG) abrasive for longest life, fastest cut and more consistent finish
- Ultra tough Y-weight backing is extremely flexible and shock absorbent
- No risk of color transfer with assured color consistency. Ideal for larger jobs and harder A/O finishes

Good choice for all sheets

ORBITAL NON-WOVEN BACK-UP PADS

- Used in conjunction with the PSA or double sided paper sheets.
- The orbital machine rests on top of the non-woven pad which acts as the driver for the abrasive, cutting softer leaving less of a scratch pattern.
- Choose white (non-abrasive) or red for a general purpose driver pad. Pad only - choose maroon for between coats abrasion and gray for light conditioning.

BLAZING THE WAY!

Designed for the most rugged of floor sanding applications, BlazeX fiber discs offer superior cut rates and product life. The stiffer fiber back gives BlazeX an aggressive cut while the ceramic grain gives it a natural super-fine scratch pattern. Whether you are dealing with aluminum oxide coated pre-finished flooring or several layers of hard finish the Norton BlazeX fiber disc will offer the best cut rate and longevity of any product on the market.

Best choice for overall smoothest finish

TECH TIP

Used with a Conditioning Pad, screens can be an optional step in the edging sequence to provide a much finer finish than a paper disc.

Used for
hard plating

Aggressive cutting
easily blends scratches
from edger and
drum sanders

For final sanding to
prevent dish out of
softer grain

Reduces dish out of
springwood on strip and
plank floors

Ideal for surface prep on
wood and concrete to
remove various residues

Good choice for quality and consistency

TECH TIP

Double-sided discs make hard plating simpler and easier by eliminating the need to mechanically fasten the disc to the bottom of the buffer. When using single sided large discs in hard plating, it is recommended to apply two discs at a time making sure the slots at the center hole of each disc are offset. This will help prevent the disc from prematurely tearing at the center hole.

Always use a screen driver pad with a double sided disc to prevent slippage, and get the flattest surface possible. You can sandwich a screen driver pad between two double sided discs to increase stiffness for an even flatter surface.

Good choice for performance and value

SILICON CARBIDE H422 & S456 PAPER

- 100% silicon carbide abrasive in E-weight and combination backing
- Cost-effective design offers strong performance with outstanding value

SHIFT INTO HIGH GEAR!

100% patented SG (Seeded Gel) ceramic alumina abrasive for longest life, fastest cut and more consistent finish. Tough F-weight backing is extremely flexible and shock absorbent for extreme conditions. No risk of color transfer with assured color consistency. Ideal for larger jobs and harder A/O finishes.

Better choice for fast cut on hard wood species

BLUEFIRE H831 PAPER

- Next generation of patented, premium, self-sharpening, 100% zirconia alumina abrasive for longer life, faster cut and outstanding durability
- The anti-static technology increases dust collection efficiency for a cleaner working environment
- The improved resin bond ensures grain retention under the most demanding applications
- And, the consistent scratch pattern means the finest finish of the floor

Powerful Dust Extraction Means a Cleaner Environment

FOR A BREATH OF FRESH AIR

The new Norton MeshPower discs are fully ceramic products designed for both raw wood sanding as well as between coat abrasion. The robust product design allows the MeshPower disc to sand for extended periods of time while delivering super-fast cut and an extremely fine scratch pattern.

The discs can be used on a variety of equipment including: random orbital sanders, multi-head rotary attachments and 16" buffers under a driver pad such as our Norton Very Fine Dark Maroon Pad.

The fully mesh backing design offers superior dust extraction and is ideal where you want an aggressive cutting action but really fine scratch pattern. The built-in hook and loop backing makes attaching the discs to the driver plates quick and easy.

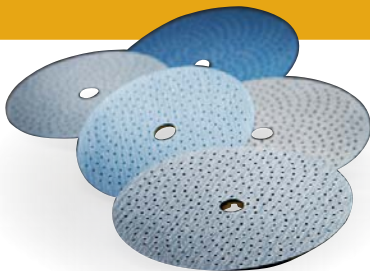

Ideal for removing edger marks and sanding stair treads

Orbital discs are used on hand-held machines for final sanding of edges and stair treads

universally DUST FREE!

- Spiral-hole hook & loop vacuum design removes material consistently while maximizing dust extraction for a cleaner work environment
- Features a No-Fil coating to resist clogging/loading during sanding
- Specialized multi-hole pattern allows for use on any random orbital sander regardless of hole pattern – including unique Festool* sander models
- Unique fiber-reinforced latex/paper backing is flexible, strong, and tear-resistant

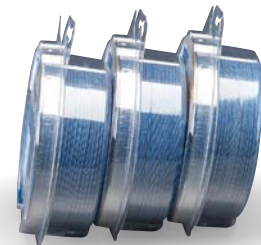

Best choice for pro results with a power tool

PROSAND MULTI-AIR CYCLONIC

- Premium ceramic alumina abrasive provides superior cut on all surfaces, lasts substantially longer and cuts faster than conventional abrasives and has been open coated to resist clogging and loading during sanding
- Universal multi-hole pattern fits all 5" and 6" random orbital sanders.
- Ideal for tight spots and stair treads.

ULTIMATE STRENGTH – NO MORE WEAR AND TEAR

An all-new exclusive backing design provides extraordinary strength with tear resistance well beyond any flexible paper disc in the market, as much 2-3X. This super-tough, polyester-reinforced D-weight hook & loop backing means exceptional edge adhesion of the grain even in the most demanding floorsanding applications; so, grain shed is virtually non-existent and the result is outstanding durability.

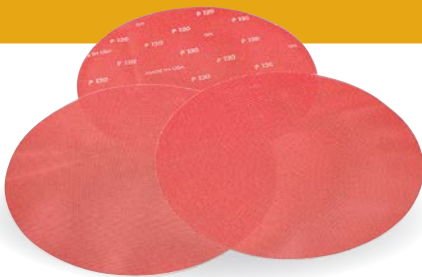

TECH TIP

To remove swirl marks left from edging. Consider sanding the edges with an orbital sander. For best results and to avoid halos, use the same grit on the orbital sander as you previously used on the edger. The super sharp ceramic alumina grain will easily remove edger marks and produce a scratch free finish.

Used for final sanding to blend sanding marks from edger and belt/drum sander

Always use a screen driver pad to prevent screen slippage and to maximize performance

Best choice for overall smoothest finish

RED HEAT Q955 SCREEN

- 100% patented SG ceramic grain
- Extremely sharp and fast cutting
- 2-3 times the life of Silicon Carbide
- Produces a finer scratch pattern than Silicon Carbide minimizing swirl marks

Best choice for driving screen discs

SCREEN DRIVER PADS

- Designed specifically for driving sanding screens and double sided discs
- Unique design prevents slippage which improves screen/disc life, cut, and finish
- Minimizes dish out of soft grain
- Can be used to buff on stain under a rotary buffer. The pad will hold and disperse stain evenly over the floor without slinging.

Used for multiple levels of surface blending on hardwood floors

Used between coats of finish to give the surface a texture to adhere to

Used to remove dust particles and raised fibers between coats

patented FOAM DESIGN!

The new way to sand between coats of finish. Unique pending design allows you to smooth and prep the surface of the floor to properly accept the next coat of finish without the risk of nasty swirl marks. Four grits – coarse, medium, fine and very fine – accommodate any application. The foam backing pad allows the product to abrade the surface without penetrating deep into the finish, resulting in a smoother overall floor.

Application Guide

BETWEEN COATS APPLICATION	SANDDOLLAR PADS
Surface Prep / Re coat Heavy Scratches	Blue or Red
Surface Prep / Re coat Light Scratches	Red
Sealer Coat Solvent Base	Blue
Sealer Coat Water Base	Red
Finish Coat Solvent Base	Red or Yellow
Finish Coat Water Base	Yellow or Green

TECH TIP

Don't over use your abrasive product when abrading between coats of finish. A worn out abrasive will still dull the surface, but it may not be putting the proper scratch into the finish to get a good mechanical bond for the next coat of finish.

If the surface isn't abraded properly, you can wind up with finish peeling, flaking and chipping. It's a lot less expensive to use a few more abrasive products on the job than to go and re-sand a job because of finish failure.

Best choice for eliminating scratches between coats

SANDDOLLAR PADS

- Norton SandDollar foam pads have a long life - approximately 1500 ft/pad
- Pads are extremely durable and tear resistant
- Design virtually eliminates the chance of cutting through the finish

Good choice for abrading between coats of finish

NON-WOVEN CONDITIONING PADS

- These 1/4" thick pads are manufactured with the finest fibers, resins and abrasives
- The unique design of this pad has a perforated 7" disc that is easily removed for use on an edger machine or simply as a hand pad
- Use a maroon conditioning pad in conjunction with our aluminum oxide PSA sheet roll, applied in strips to the pad; this combination is especially effective on water-based finishes where screening takes away too much finish

ALUMINUM OXIDE PSA SHEET ROLLS

- Use a maroon conditioning pad in conjunction with our aluminum oxide PSA sheet roll, applied in strips to the pad
- This combination is especially effective on water-based finishes where screening will take away too much finish.

CERAMIC ALUMINA PSA SHEET ROLLS

- Use a maroon conditioning pad in conjunction with our ceramic alumina PSA sheet roll, applied in strips to the pad
- The ceramic grain allows for extra-long life and super-fine scratch pattern

Application Guide

Faster cutting and consistent blade sharpening

HAND SCRAPER / SHARPENER KIT

- Comes with a custom sharpening jig which provides a super-sharp and consistent blade while eliminating the dangers of sharpening with a file by hand
- Ergonomic handle provides a comfortable feel and its flex allows for maximum scraping capacity
- To sharpen blade simply attach to the guide rod of the sharpening jig; a few passes and its ready to go
- The kit comes with two handles and two blades; replacement blades are sold separately

PART #	DESCRIPTION	STD PKG / MOQ
Hand Scraper / Sharpener Kit		
66261170592 9	Scraper Kit	1 / 12
66261170625 4	Replacement Blades	25 / 25

*MOQ – minimum order quantity might be higher than package quantity for make-to-order items.

Ideal for masking and hanging plastic sheeting for dust control

PREMIUM GRADE CLEAN RELEASE TAPE

- Premium grade, clean-release tape meets or exceeds market standards
- Available in various widths for maximum versatility
- Medium adhesion masking means just enough tackiness to stick well to surfaces without the risk of pulling off point from the wall or leaving adhesive behind

PART #	SIZE	STD PKG / MOQ
60 Yard Rolls		
07660702451 0	1"	36 / 36

Wood Flooring Species

MEASUREMENT CRITERIA

The Janka hardness test is a measurement of the force necessary to embed a .444-inch steel ball to half its diameter in wood. It is the industry standard for gauging the ability of various species to tolerate denting and normal wear, as well as being a good indication of the effort required to either sand, nail, or saw the particular wood.

WOOD SPECIES	HARDNESS	SANDING PRODUCT									
		BLAZE	RED HEAT	BLUEFIRE	NEON						
Imported Woods		BLAZE	RED HEAT	BLUEFIRE	NEON						
Tipe / Brazilian Walnut / Lapacho	3684										
Cumaru / Brazilian Teak	3540										
Ebony	3220

NORTON

SAINT-GOBAIN

PRODUCTS FOR THE PROFESSIONAL HARDWOOD FLOORING MARKET

NORTON BLAZE
BLAZE YOUR WAY TO PRODUCTIVITY!

Tackle gym floor re-sands and UV-cured pre-finished floors with ease.

NORTON MESHPOWER
POWERFUL DUST EXTRACTION!

Designed for virtually dust-free sanding for a cleaner and healthier working environment and a better finish.

NORTON SANDDOLLAR
STRIP AWAY OLD IDEAS!

Smooth and prep the surface of the floor to properly accept the next coat of finish without risk of swirl marks.

NORTON RED HEAT
HOOK & LOOP DISCS!

For the finest scratch pattern in the industry.

FINISH YOUR FLOORS
WITH CONFIDENCE!

Applicators designed to quickly and easily apply floor finish or sealer with superior results.

NORTON HARDWOOD FLOOR
FAST SET EPOXY KITS!

Designed with a quick set time, the Norton Fast Set Epoxy is perfect for all board repairs.
